Introduction

TPP has advised on several sports and leisure facilities providing expertise related to transport issues such as travel planning, impact assessments and developing design solutions. A summary of some of the key projects is provided below.

The O₂ Arena, Greenwich (Client: AEG)

The O_2 Arena is one of the world's premier concert and leisure venues, located on the Greenwich Peninsula. TPP has been involved with transport planning for the Arena since 2006. This work has included producing the venue Travel Plan, developing access arrangements, car park design, servicing and producing a wide-ranging signage strategy.

We have also helped secure consents for a $18,660m^2$ office development, a

25,000m² Factory Outlet Village within the tent and the "Up at The O_2 " walkway over the top of the tent, all on behalf of AEG. We also undertake ad-hoc traffic management measures for special arena events such as The Brits Awards.

Olympic Venues, East London (Client: Olympics Delivery Authority)

TPP was involved in producing an initial traffic management plan for the London 2012 Olympic venues located in Greenwich. These are the North Greenwich Arena, Royal Artillery Barracks and Greenwich Park. The work involved reviewing car parking controls across Greenwich and the pedestrian routes to the venues. TPP

reviewed proposals for park-and-ride facilities, coach parking and local bus access. Local walk catchments were produced for each venue using the ACCESSION accessibility program.

Ealing Cinema (Client: Empire Cinemas)

This project involved redeveloping the existing cinema to provide a mixed-use leisure complex with a new eight screen cinema, bars, restaurants and shops. TPP's work included advice on servicing and analysis of car parking across the day in Ealing Town Centre. A Transport Assessment and Travel Plan were also prepared for the proposals.

National Maritime Museum, Greenwich (Client: National Maritime Museum)

The Sammy Ofer Wing at the National Maritime Museum in Greenwich provides custom-designed exhibition spaces which will cater for an evergrowing volume of visitors, from the UK and internationally. It opened in the summer of 2012.

TPP prepared a comprehensive Transport Assessment working closely with the museum to quantify future visitor numbers. We met with TfL and Greenwich Council, reaching agreement with both parties on

transport issues. As well as assessing the transport impact of the future visitors, our work included advising on servicing, construction access and cycle parking.

St Mary's University College (Client: St Mary's College)

St Mary's University College in Twickenham is one of the country's leading sports colleges. The College secured planning consent from the LB of Richmond upon Thames for a new teaching and sports facility ahead of London 2012. TPP prepared a Transport Statement and Travel Plan to accompany the planning application. TPP also assisted in the implementation of a campus-wide car parking strategy aimed at reducing car -borne trips to the college.
